30 YEARS OF PRODUCT AND SERVICE EXCELLENCE

Lecaflor, “Clean Admission”, 10mm Graphite Rubber matting with Anthracite wiper inserts.

Clean Admission 10mm gauge entrance matting system

10mm thick, adaptable to any existing matwell.

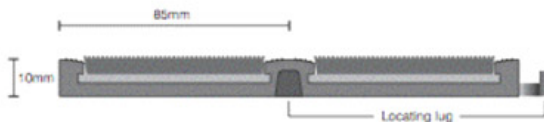

The 50cm square, precision moulded tile base has unique integral jigsaw type clip fixing to ensure that the 50cm x 50cm modules remain safely in place once installed.

A robust moulding incorporating flexible lateral scraper ribs interspersed with twin fibre tufted Nylon 6.6 pile provides a 100% contact surface which ensures maximum dirt and moisture retention right at the doorway, keeping floor maintenance requirements to a minimum.

For flat on floor applications “Clean Admission” offers a mechanically secured 0-70mm ramp edge section with stylish swept corners, the modules then simply snap in place to produce a high specification surface mounted entrance matting installation which will meet the most stringent flooring specification requirements through to IMO standards.

Tile Section

Ramp-edge Section

A 110mm 0-10mm 'Lock Down'
ramp edge strip ensures smooth
threshold transmission.
